## Not Allowed:

- Changing the individual Cell Titles, ex "Project Name" in title block
- SM DOCUMENT NO. in Title Block This is an auto populated field that comes from Vault. Whatever you name it in Vault will be shown here. Cannot Edit
- Changing Column Names
- Adding Rows without using the "+Row" button at top right (you can still format and resize, but this keeps users from adding a row outside of the table)
- Deleting Columns
  - ITEM, QTY, PROJECT TAG, DESCRIPTION, MANUFACTURER, MFG PART NO. and SM PART NO. are CRITICAL to making this thing work. If Calvin, Ryan, and Clay agree.....When we do not want to show a customer SM PART NO. or MFG PART NO. etc, just click on the header and make the color the same as the background and leave the corresponding rows below blank. I cant give you guys a Title Block if we do not have at least 7 Columns that maintain a relatively consistent size.
- Leaving Status Column Blank. As you use the "+Row" button, each corresponding field will be set to status "Preliminary" by default. If you need to add a break in between data on BOM and create a sub title, you are free to do so. AS LONG AS the status field contains "-" for blank.
- Adding new worksheets to Workbook
- Renaming worksheet from "BOM" A lot of my VBA code rides on using tab name "BOM"
- There is no longer a need to Protect the workbook, it is protected by default now. Any structural changes, column name changes, additions or deletions will need password.

  I will have password and Ryan Leblanc will have password.

## Set Trust Center for Excel Macro Workbook

- 1. From Vault Check out and Open BOM Workbook
- 2. Go to File -> Options
- 3. Go to Trust Center
- Click "Trust Center Settings"
- 5. In Trust Center Settings window select "Macro Settings" from left column
- 6. Click "Disable all macros except digitally signed macros"
- 7. In same Trust Center Settings window select "Trusted Locations" from left column
- 8. Select "Add Location"
- 9. Browse for "C:\Work" (This is your Vault Working Folder, if it is not set to this already please let me know)
- 10. Select "Subfolders of this location are also trusted
- 11. Save Settings and Exit

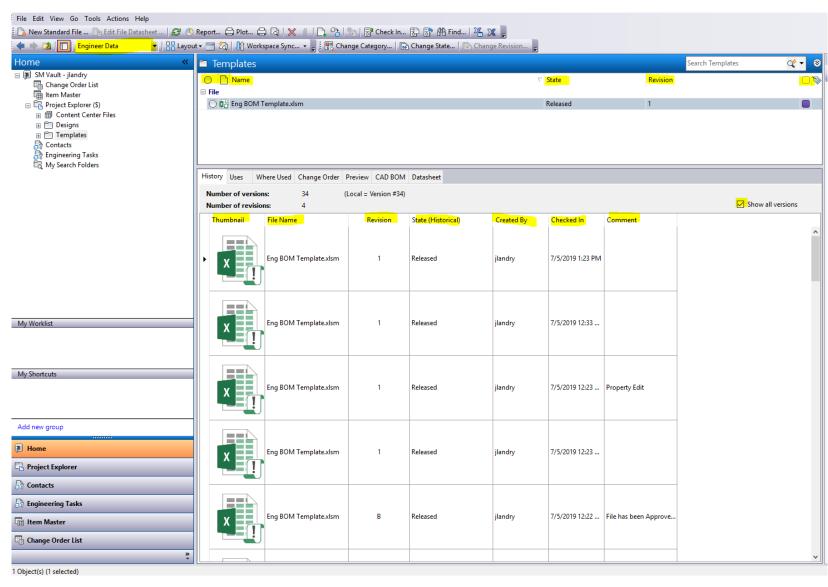

## Set Trust Center for Excel Macro Workbook cont...

Microsoft Office Trusted Location	?	×					
Warning: This location will be treated as a trusted source for opening fil you change or add a location, make sure that the new location is secure Path:							
C:\Work							
✓ Subfolders of this location are also trusted  Description:	<u>B</u> ro	wse					
Date and Time Created: 7/5/2019 12:44 PM  OK	Ca	ncel					

To see properties relevant to BOM, you will need a custom view similar to the following:

To see properties relevant to BOM, modify your custom View Settings in Vault to include the following:
